

ASOM March 2013

This was school number twenty three
What could the meaning of this number be?
Called to apostolic ministry?
Or two plus three for grace, you see

To catch this message with your heart
You have to shut down to restart
So lay down your charismatic mentality
Or you won't understand this family

We build a culture of fellowship
With tea and snacks, a chip and a dip
We stay together and tolerate snoring
We seek God's voice in the lion's roaring

Thamo spoke about the second time
When God revisits your paradigm
It's like the book of Deuteronomy
Where He gives you stronger lenses to see

Revelation will be shut down for a while
Till the word already received, has altered your style
But if you should not submit and agree
You'll say "the grace does not work for me"

The things of Christ have been concealed
And therefore have to be revealed
But theology man learns and believes
It's the knowledge that the flesh achieves

We have to process the things God has shown
Before He will make any more secrets known
Our teachings need to be redefined
To ensure they still convey God's mind

We came to see God's awesome plan
Man meant for light and light for man
It's the reason for our spiritual birth
It's the way God's glory will fill the earth

So God created the darkness of night
Which really is the absence of light
He also created calamity
And man has lost his sanity

God is the future and also the past
It's all one place - the first and the last
What goes around will come around

From light we get photo and also sound

While man is searching for vitality
It's light that carries immortality
But now there's still a cosmic groan
Until the day God can be shown

Of this one thing you can be certain
Each heaven is pictured as a curtain
While light is wisdom and revelation
Glory will be its manifestation

We heard of a super-abundance of grace
Where God will be shown to the human race
If grace is in you, people will know it
For every part of your life will show it

It's really a substance that can be explained
But you need to have an ear that is trained
An essence that refers to a reality
And also related to divinity

Because of this grace we will function
Not from ourselves but with heavenly unction
It's the imposition of the nature divine
Into a body like yours and mine

In a system not properly constituted
You'll see that grace is prostituted
By sceptres, thrones and armour-bearers
Short sermons, smoke rooms and signet-ring wearers

And then there is the doma grace
Tailor-made for every face
To study this you can look at the ark
And the rod that blossomed in the dark

The grace that's really from above
Will always show itself in love
And it will overshadow all
That we've kept over from the fall

There was a day when Saul of Tarsus
Came to know of hupostasis
It really speaks about the basis
Of all the different forms of graces

Peter's shadow has declared

This stuff in us can also be shared
We learnt what Jesus meant when He said
Ask your Father for your daily bread

It's God dispensing Himself to you
And that is why it is so true
We will become just what we eat
So the manna of grace must be our meat

It comes in quotas called dabar
It's not about your house or car
But if the rhema word is heeded
It carries everything that's needed

And so God uses your set man's voice
A method in which you have no choice
The law will come your desire to test
And lead you to a place of rest

Grace may be seen in the external
But is based upon the truth internal
So the inner man will be verified
By what he is on the outside

Whether it's daughter, son or spouse
There's only one way to build God's house
And come to a place where our labours cease
It's all locked up in the grace we release

This is not like primary school
It's only by the word we rule
But our conduct should also underline
That our authority is doing fine

If you are eating from the wrong man's field
Then death is all your pot will yield
But a pure apostolic stream will supply
The word of covering, and you won't die

And so the agent is Zerubbabel
Though in himself not capable
But the Holy Spirit through him will shout
And the grace will bring the capstone out

God has arranged something special
By dispensing His grace in a certain vessel
The agency of the apostle is used
For the bread of doctrine to be produced

When apostles' doctrine is received
Before by the church it can be believed
It has to be made into food
And then the people will say "It is good"

Apostles come to establish the saints
And help them break through their restraints
Now you can clearly see the reason
Why the sent one gives food in due season

So here is the answer for the nation
The hallmark of apostles is revelation
To go to heaven, the stuff to get
And set the house of God erect

The answer to your ability
Lies only in your humility
Then your preaching will pierce the heart
And bitterness won't play a part

Shaun did not take us for tea and crumpets
When he spoke on the two silver trumpets
He used the word to make us see
How nations will come to bended knee

It's not just some religious game
But all about using God's holy Name
This is the essence of the two-edged sword
You have to confess Jesus as Lord

So when you do that, allegiance you swear
How can you ever backslide from there
Your body becomes a living sacrifice
And you do what is right, not what is nice

God's voice is always activated
And heavenly order out of chaos created
When a son, mature, in the earth does stand
To represent Him in the land

So by this time you must have heard
God always creates by speaking a word
But for this word to bring faith to your heart
Connect to the preacher – that is your part

We head the Name of El-Shaddai
And also that of Adonai

But still the greatest of them all
"Abba Father" – that's our call

We had a look at Jacob's life
One that started with cheating and strife
So if you connect to the words God spoke
You too can become a pleasant bloke

The way for God to take the nations
Is that we build in generations
But if you don't become a leaning man
You will not have a part in this plan

So that which is in the father's heart
Will be built by a son if he is smart
The way to do it with kids and wife
Is to model it in their family life

You cannot journey in the night
But have to cross over when the time is right
The daybreak will end your wrestling match
You have an appointment with Esau to catch

We came to see the different conditions
Regarding the two end-time positions
On one side there is Babylon
Described by Jeremiah and John

And then there's Zion, the highest mount
It's not defined by an earthly account
It does not drink the harlot's wine
But salt, yeast and light will make it shine

Your only hope, in this parched, dry place
Is that of standing in His grace
Pouring out your life unto death
Willing to also give up your breath

Sagie took us on a fishing trip
And also gave us a useful tip
On how to catch a mega-son
The type you would call number one

There's something Augustine did see
It's got to do with the number 153
These mega-sons will come from the nations
They won't be "laaities" or cheap imitations

They represent a special kind
Who do not have a messed-up mind
The day of a clean catch is surely at hand
And only the culture this bargain can land

So in an apostolic gathering
That functions strong in fathering
There won't be any Canaanite
The enemy's roar will have no might

These mega-sons will freely give
'Cause this will be the way they live
Any pocket will be good enough
The Gun-Gum style will deliver the stuff

A baby without a milk urgency
Is always a medical emergency
But many Christians don't desire the Word
And never grow in the things they've heard

So in this move some people we greet
Because the pastor needs their seat
Creating space for the mega-sons
Then God can send the hungry ones

You cannot just go back to fish
If that is not the Father's wish
You won't catch a thing and you'll wonder why
But you've satisfied the god called "I"

Now don't get superstitious and vote
For the left or right side of the boat
It's whether or not you did obey
The things the Master had to say

This is exactly the reason why
So many christians have run dry
And later the fruit through suffering is earned
By then that's how obedience is learned

So after this you should not rush
To take a run into the bush
For the poison ivy might scratch your face
And you'll be treated in an unwanted place

There is a truth we learned afresh
Our enemies are satan, the world and the flesh
But sons will enforce Christ's victory

For all the world the light to see

We have to produce sons with weight
Those who the world and its system hate
They'll give themselves to apostolic culture
And not seek to score like a spiritual vulture

The blind man's life was rearranged
And as a result his walk also changed
These mega-sons will not only give
But also be cautious how they live

And then we saw it once again
Written by John in Revelation ten
How Jesus Christ as a mega-son
Made the Jew and Gentile one

While the world has seven wonders
We thought we heard the seven thunders
But through the storm we got the message
From this wonderful Bible passage

Our only ministry in the nation
Is that of reconciliation
If we want an earth with glory filled
The city church we have to build

The seven thunders have been sealed
But the mystery of God and Christ revealed
Apostles and prophets have caught the sound
The "one new man" in Him is found

The mega-son will live from above
His God will be his only love
And though he had a natural birth
He won't be subjected to the earth

Though stars might seem magnificent
Their music is not innocent
Like lady Kaka and the bikes of Beijing
You'll have to watch with whom you sing

Because your children are no fools
You'll have to guide them by some rules
Or else God's truth, the "alethia"
Will be overruled by Maria Caria

We have to exit from Babylon

And there are battles to be won
With the rod of correction you can at least
Help to overcome the beast

We also had the wonderful chance
Of getting a visit from apostle Frans
He came one morning, the saints to greet
And told us how he his Physician did meet

Early one morning, still in the night
The Healer assured him it will be alright
He said His word had to be spoken
Over the body that still seems broken

The file contained his original design
Of his medical history not one single line
And this he also said to Frans
The account has fully been paid in advance

We've come to the time to say good-bye
But in seven months we will say hi
So keep yourselves, be watchful and sober
Until we see again in October

Let me just give you the golden rule
For this and every other school
That if, with this word, you disagree
The Lord will make it plain to thee
